## In-Transit Data Loggers

DeltaTRAK's FlashLink In-Transit Data Logger is the newest and most advanced electronic temperature recording instrument which documents environmental conditions encountered during the storage and transportation of temperature sensitive commodities.

The FlashLink In-Transit Data Logger is a single use device. It is the only unit on the market that is designed with a patented Shadow Logging fail-safe feature which guarantees data recording even if the operator fails to activate the unit. Up to 3800 data points can be stored in memory and downloaded to a PC in 5 seconds via the Windows Program Manager software.

This user friendly, feature-packed software can be accessed via DeltaTrak's Internet website from anywhere in the world. Since the FlashLink In-Transit Data Logger Connects Directly with your printer cable, no special interface is needed for the stored data to be viewed as a graph or in numerical listing reports with statistical analysis. The data can also be imported into a spreadsheet or sent via E-mail directly from the Program Manager Software, or downloaded directly into a handheld printer. It can also be integrated into DeltaTrak's Web-hosted, global logistics information services program.

Internal Temperature Sensor Range :	-40 - 150 ( -40 - 66 )
External Low Temperature Sensor Range:	-112 - 230 ( -80 - 110 )
Temperature Accuracy :	± ( ±0.5 ) at 32 to 150 ( 0 to 66 ) ± ( ± ) over entire range
Temperature Resolution :	0.1 / )
Logged Data Capacity :	3,800 data points
Data Download Time :	5 seconds typical for 3,800 data points
Enclosure :	ABS plastic case with protective utility package 3.7"W x 5.25"H x .88"D (9.4cmW x 13.3cm H x 2.2cm D)
Certifications :	T.U.V. – CE Mark – Traceable to N.I.S.T.
